

HAMILTON MIGWAMBO

Junior Full-Stack Developer (Java + Spring Boot + Angular/React) | Remote | Available Worldwide
migwambohamilton42@gmail.com | GitHub: <https://github.com/hamilton2959>

PROFESSIONAL SUMMARY

Full-Stack Developer with 1+ years of experience building scalable, secure, and high-performance applications using Java (Spring Boot) and Angular/React. Proven ability to own features end-to-end—from architecture and database design to REST API development, UI implementation, deployment, and monitoring. Strong background working with AWS, CI/CD pipelines, MySQL optimization, Redis, and real-time systems.

Known for writing clean, testable code, mentoring teams, and leading engineering efforts on high-scale SaaS platforms.

CORE SKILLS

Backend: Java 17/21, Spring Boot 3.x, Spring MVC, Spring Security, REST APIs, Microservices, Redis, MySQL, PostgreSQL, DynamoDB

Frontend: Angular 15+, React 18, TypeScript, RxJS, NgRx/Redux, TailwindCSS, Material UI

DevOps: AWS (RDS, Lambda, CloudWatch, S3, ElastiCache), CloudFormation, AWS CDK

CI/CD: Maven, Gradle, Jenkins, GitHub Actions, AWS CodePipeline / CodeBuild

Testing: JUnit 5, Mockito, Spring Boot Test, Integration & Unit Testing

Other: Docker, Kafka, WebSockets, STOMP, Hibernate/JPA, Lombok, Git workflows, Security & OWASP, Scalable SaaS architecture

PROFESSIONAL EXPERIENCE

Junior Full-Stack Developer — Remote

Freelance / Contract | 2025 – 2026

- Led full-stack development for SaaS and enterprise applications using Java Spring Boot 3.x and Angular/React.
- Designed and consumed RESTful APIs, improving response time by up to 40% through caching and query optimization.
- Built real-time systems using Spring WebSockets & STOMP for notifications, chats, and analytics dashboards.
- Designed efficient database schemas and optimized SQL queries using indexing, partitioning, and Redis caching.
- Developed scalable background processes with Spring Batch, @Async task executors, and AWS Lambda.
- Implemented Infrastructure as Code using AWS CDK for automated provisioning of Lambda, RDS, CloudWatch alarms, and S3.
- Built and maintained CI/CD pipelines using Jenkins, Maven/Gradle, GitHub Actions, and AWS CodePipeline.
- Mentored junior developers, improving team code quality and onboarding time.
- Documented APIs using OpenAPI/Swagger (springdoc-openapi), and wrote ADRs for architectural decisions.

Key achievements:

- Reduced AWS Lambda execution costs by 24% through JVM cold-start optimization and provisioned concurrency tuning.
- Improved application response time from 1.2s → 350ms using Redis caching and Hibernate query refactoring.
- Successfully led migration of a monolith Spring MVC application to a modular microservices architecture.

EDUCATION

Bachelor of Science in Computer Science

Chuka University | 2023 – Present

PROJECT HIGHLIGHTS

Document Workflow System (SaaS) — Spring Boot + Angular + AWS

- Built a multi-role document approval workflow system using Spring Boot and Angular.
- Implemented file storage with AWS S3 and real-time notifications via Spring WebSockets/STOMP.
- Architected PostgreSQL/MySQL schema supporting thousands of concurrent transactions with Spring Data JPA.

Academic Management Platform (Spring Boot 3.x)

- Designed and built tutor–student role system, course assignments, and material uploads with Spring Security RBAC.
- Implemented dynamic dashboards with React and TailwindCSS, backed by RESTful Spring Boot APIs.

E-commerce Microservices

- Implemented modular Spring Boot microservices for authentication (Spring Security + JWT), checkout, and inventory.
- Used Apache Kafka for inter-service messaging, AWS Lambda for serverless tasks, and CloudWatch for monitoring.

CERTIFICATIONS

- Java Spring Boot – Advanced Development (course-based)
- Angular & TypeScript Advanced Training
- Docker & Containerization Fundamentals
- AWS Cloud Practitioner Essentials

TECHNICAL STRENGTHS

- Strong knowledge of application security, Spring Security, OAuth2, and JWT
- Performance optimization with JVM tuning, connection pooling, and caching strategies
- Cloud-native development & auto-scaling on AWS
- Writing clean, maintainable, testable Java code following SOLID principles
- Excellent communication and mentoring skills

TOOLS & TECHNOLOGIES

Java 17/21 | Spring Boot | Spring Security | Hibernate/JPA | Maven | Gradle | Angular | React | TypeScript | Redis | MySQL | PostgreSQL | DynamoDB | Kafka | Docker | AWS (RDS, Lambda, S3, CloudWatch, ElastiCache) | CloudFormation | AWS CDK | Git & GitHub | Jenkins | Jira | Nginx
